

# NISHA PANT

1 (224) 366-0520 | nishap2@illinois.edu | github.com/nishapant | nishapant.github.io

## EDUCATION

|   |                   |
|---|-------------------|
| <b>University of Illinois at Urbana Champaign</b>   | Expected May 2022 |
| <i>B.S. Computer Science</i>  | GPA: 3.68/4.0     |
| <ul style="list-style-type: none"><li>• <u>Relevant Coursework</u>: Algorithms and Models of Computation, Data Structures, Discrete Structures, Probability &amp; Statistics in CS, Artificial Intelligence, Social &amp; Information Networks, Computer Architecture, Applied Linear Algebra, <u>Involvement</u>: HackIllinois Staff, Reflections   Projections Staff, Women in Computer Science</li></ul> |                   |

## EXPERIENCE

|  |                   |
|--|-------------------|
| <b>University of Illinois at Urbana Champaign – Undergraduate Researcher</b>   | Jun '20 – Present |
| <ul style="list-style-type: none"><li>• Researching bluetooth technology under Professor Hari Sundaram to be utilized for COVID-19 contact tracing</li><li>• Developing an iOS contact tracing application in Swift to be adopted by over 40,000 UIUC students</li><li>• Designing a machine learning model to calculate the distance between two devices using bluetooth with a much higher accuracy than using Received Signal Strength Indicator (RSSI)</li></ul> |                   |
| <b>FanScript – Full-Stack Intern</b>   | May '20 – Present |
| <ul style="list-style-type: none"><li>• Building a full-stack, fully-responsive web application with a React frontend and a SpringBoot backend that dynamically simulates sport and concert venues with activities for fan engagement</li><li>• Applying RESTful API designs when making HTTP requests to receive data for the simulator</li></ul>   |                   |
| <b>Vimeo – Software Engineering Intern</b>   | May '20 – Aug '20 |
| <ul style="list-style-type: none"><li>• Cancelled due to COVID-19</li></ul>  |                   |
| <b>University of Illinois at Urbana Champaign – PURE Undergraduate Researcher</b>  | Oct '19 – Dec '19 |
| <ul style="list-style-type: none"><li>• Collaborated to build a machine learning model to separate audio files with multiple sound sources</li><li>• Analyzed audio files using machine learning models built in Python (Pandas and SKLearn) that distinguish between multiple sound sources in one audio file</li></ul>   |                   |
| <b>Vimeo – Software Engineering Intern</b>   | Jun '19 – Aug '19 |
| <ul style="list-style-type: none"><li>• Improved user upload and video experiences within the Apple Mobile Workflow team</li><li>• Integrated a Siri shortcut feature (currently in production to over 90 million active users) into the iOS Vimeo application that allows users to instantly upload videos to Vimeo</li><li>• Created product design specification for a Vimeo Creator Chrome extension</li></ul>   |                   |
| <b>Northwestern University – Research Intern</b>   | Jul '18 – May '19 |
| <ul style="list-style-type: none"><li>• Conducted research on secure querying for federated databases with Professor Jennie Rogers to be used by hospitals for searching private patient datasets</li><li>• Improved Java applications to make searching within federated datasets more efficient</li></ul>  |                   |

## PROJECTS

|  |                   |
|--|-------------------|
| <b>Suasana</b>   | May '20 – Present |
| Working on a team of three to build an eco-friendly habit-tracking application in iOS. The app incorporates a chatbot built with Dialogflow that helps users track sustainable habits and learn more about reducing the user's carbon footprint. |                   |
| <b>International Diamond Company Website</b>   | Apr '20 – Present |
| Creating a full-stack e-commerce website for a local jewelry store where consumers will be able to browse and purchase inventory. The website is fully-responsive and was built using React, GraphQL, MongoDB, and the Stripe API.               |                   |

## SKILLS & AFFILIATIONS

---

- **Technologies:** Java, C++, React, Swift, Python, Django, GraphQL, Git, Bash, JavaScript, HTML/CSS
- **Women in Tech:** Girls Who Code Alumna, SEEDS Alumna, Rewriting the Code Fellow
